NIFTY OUTLOOK

Yesterday the Nifty opened with flat note and traded highly volatile, Nifty made high of 5971.20 and not sustained at higher level witnessed which brought it down and registered low of 5930.35 levels and finally at end of the day it closed at 5942.35 levels with minor loss of 3.35 points.

- ♦ The price action has formed high wave candle with small body with long upper shadow indicates selling pressure at higher levels. The indices precariously closed above the important fibonacci ratio 61.80 (6111.80 5663.60). Going forward indices facing the resistance near the multiple top (Double Top) 5971 the time difference between these 2 tops is 13 trading sessions.
- In today's session indices completed retracing the last leg of the decline from 5971 - 5663 consuming five trading session. This highlights the impulsive nature of current pullback rally. Such last declining leg consumed nine session and a faster retracement of the same would confirmed if Nifty closed above 5971 in coming couple of sessions, such event likely to signal change of guard for short term perspective and bring back into the reckoning.
- ♦ The Nifty has maintained a higher high higher low sequence in the last six sessions which turns immediate bias will positive as long as the previous session's low is protected. The Immediate support is placed in the Daily Gap area between 5883 & 5878 while key near term support is placed around 5825 followed with 5840 5883 (Midpoint of the 8th March 2013 Weekly Bullish Candle body) on a Weekly Close basis.
- ♦ For today trend deciding level for Nifty placed at 5948 if Nifty trade above this level then it may go up to 5980 5990 6020 level. However if Nifty trade below 5948 then it may find immediate support at 5930 level any violation of such support would signal further decline up to 5900 5880 level.
