NIFTY OUTLOOK

Yesterday Nifty commenced with flat note and shown bounce back from the low of 5911 and then traded lackluster with positive bias with narrow range of 33 points. At end of the day Nifty closed at 5898.20 with gain of 10.80 points. It was third consecutive session where nifty closed below 5900 level.

- ◆ The Price action on daily chart has formed high wave candle with small bodied bull candle with shadows in either direction indicates indecisiveness among the market participants. The Nifty's short term trend remained negative bias as long as it trade below 6000 level and move below 5853 downtrend will get reasserted and in such scenario we may witness faster retracement towards 5800 5820 region being 50% retracement levels of the entire rally from November 2012 low of 5548 to recent high of 6111, and below that the next support is seen at 5730 5735.
- ♦ However, key short-term resistance is placed between 6013 (61.8% Fibonacci retracement level of the fall from 6112 to 5854) & 6019 (24th January 2013 Daily Closing Trough).
- ♦ The recent declines in Nifty resulted in a bearish crossover of 8 x 21 EMA for the first time since late November 2012, and substance below 21 EMA currently placed around 5952 will see the index remain in corrective mode.
- ♦ In the entire up move since June 2012 lows, each up leg has been retraced by maximum 50% as the index has tended to form higher bottom precisely near the 50% retracement mark of the preceding up leg The 5800 5820 region remains a crucial support from a medium term perspective being the 50% retracement levels of the entire rally from November 2012 low (5548-6111). However, key short-term resistance is placed between 6013 (61.8% Fibonacci retracement level of the fall from 6112 to 5854) & 6019 (24th January 2013 Daily Closing Trough).

For today trend deciding level for Nifty placed at 5896 if Nifty trade above this level then it may go up to 5920 - 5940 - 5955 level. However if Nifty trade below 5896 then it may find immediate support at 5875 level any violation of such support would signal further decline up to 5850 - 5830 level.
